³Materials Science and Engineering Division, Material Measurement Laboratory, NIST

May 26, 2021

1 Background

2 Methods

3 Results

4 Discussion

5 Conclusions

6 Explicit Citations (to be deleted soon)

This paragraph is a placeholder to enumerate the citations that will be used in this report. [?] and [?] are the 2 first citations that come by alphabetical convention. Next come [?], [?], and [?]. This is followed by [?], [?], [?], and [?]. Moving on, we have [?] and [?], accompanied by 2 works by the same author: [?] and [?]. As we move towards the end of the citations, we have [?] and [?] rounding out the list of citations used in this report. I'm adding an extra line so that we can get the *References* section on its own page.
